What kind of change does this PR introduce? (check at least one)

- ☐ Bugfix
- ☐ Feature
- ☐ Code style update
- ☐ Refactor
- ☐ Build-related changes
- ☐ Other, please describe:

Does this PR introduce a breaking change? (check one)

- ☐ Yes
- ☐ No

If yes, please describe the impact and migration path for existing applications:

The PR fulfills these requirements:

- ☐ It's submitted to the `dev` branch for v2.x (or to a previous version branch), *not* the `master` branch
- ☐ When resolving a specific issue, it's referenced in the PR's title (e.g. `fix #xxx[,#xxx]`, where "xxx" is the issue number)
- ☐ All tests are passing: https://github.com/vuejs/vue/blob/dev/.github/CONTRIBUTING.md#development-setup
- ☐ New/updated tests are included

If adding a **new feature**, the PR's description includes:

- ☐ A convincing reason for adding this feature (to avoid wasting your time, it's best to open a suggestion issue first and wait for approval before working on it)
