Page.$$() method

The method runs `document.querySelectorAll` within the page. If no elements match the selector, the return value resolves to `[]`.

Signature:

```
$$<T extends Element = Element>(selector: string): Promise<Array<ElementHandle<T>>>;
```

Parameters

Parameter	Type	Description
selector	string	A `selector` to query page for

Returns:

Promise<Array<ElementHandle<T>>>

Remarks

Shortcut for Page.mainFrame().$$(selector).
