Introduction

Get together   Before starting a new implementation, please check if there is any work in progress for the stack you want to work on.
If someone else has started working on an implementation, **consider jumping in and helping them!** by contacting the author.

Otherwise: 1. fork our starter kit 2. Read the followings sections: *expectations* and *features* for a better understanding of this project 3. Read the frontend and/or the backend specs 4. Submit the new implementation here
