# SuperTokens Example

This is a simple set up for applications protected by SuperTokens.

## How to use

- Execute `create-next-app` with npm or Yarn to bootstrap the example:

```
npx create-next-app --example with-supertokens with-supertokens-app
# or
yarn create next-app --example with-supertokens with-supertokens-app
# or
pnpm create next-app -- --example with-supertokens with-supertokens-app
```

- Run `yarn install`

- Run `npm run dev` to start the application on `http://localhost:3000`.

## Notes

- Take a look at SuperTokens documentation.
- We have provided development OAuth keys for the various in build third party providers in the `.env` file. Feel free to use them for development purposes, but **please create your own keys for production use**.
