No Sync Scripts

Why This Error Occurred

A synchronous script was used which can impact your webpage's performance.

Possible Ways to Fix It

Script component (experimental)   Use the Script component with the right loading strategy to defer loading of the script until necessary.

```javascript
import Script from 'next/script'

function Home() {
  return (
    <div class="container">
      <Script src="https://third-party-script.js"></Script>
      <div>Home Page</div>
    </div>
  )
}

export default Home
```
