`build` `passing`

path-key

> Get the [PATH](#) environment variable key cross-platform

It's usually `PATH` , but on Windows it can be any casing like `Path` ...

Install

```
$ npm install path-key
```

Usage

```
const pathKey = require('path-key');

const key = pathKey();
//=> 'PATH'

const PATH = process.env[key];
//=> '/usr/local/bin:/usr/bin:/bin'
```

API

pathKey(options?)
