Setting proxies for source code used by `go get` (listed in GoGetTools)

Windows command line

```
$ set http_proxy=http://proxy.example.com:port
```

git

```
$ git config [--global] http.proxy http://proxy.example.com:port
```

mercurial

Edit `~/.hgrc` and add the following:

```
[http_proxy]
host=proxy.example.com:port
```

svn

Edit `~/.subversion/servers` and add the following:

```
[Global]
http-proxy-host=proxy.example.com
http-proxy-port=xxxx
```
