Gem plugin

This plugin adds completions and aliases for [Gem](#). The completions include the common `gem` subcommands as well as the installed gems in the current directory.

To use it, add `gem` to the plugins array in your zshrc file:

```
plugins=(... gem)
```

Aliases

Alias	Command	Description
gemb	`gem build *.gemspec`	Build a gem from a gemspec
gemp	`gem push *.gem`	Push a gem up to the gem server
gemy [gem] [version]	`gem yank [gem] -v [version]`	Remove a pushed gem version from the index
