Algorithm Life-Cycle Diagrams

This directory contains the algorithm life-cycle diagram sources.

The canonical life-cycles are in the spreadsheet.

The various .dot files are graph descriptions for the GraphViz tool. These omit edges and should be used for guidance only.

To generate the rendered images, you need to install the following packages:

```
sudo apt install graphviz cpanminus
sudo cpanm Graph::Easy
```

Running `make` will produce a number of `.txt` and `.png` files. These are the rendered `.dot` files. The `.txt` files require additional editing before they can be added to the manual pages in `internal/man7/life_cycle-*.pod`.
