zh-CN

使用操作区，并自定义子节点，适合使用在需要展示一些复杂的信息，帮助用户快速了解这个页面的信息和操作。

en-US

Use the operating area and customize the sub-nodes, suitable for use in the need to display some complex information to help users quickly understand the information and operations of this page.

```jsx
import { PageHeader, Tag, Button, Statistic, Descriptions, Row } from 'antd';

export default () => (
  <>
    <PageHeader
      className="site-page-header"
      onBack={() => window.history.back()}
      title="Title"
      subTitle="This is a subtitle"
      extra={[
        <Button key="3">Operation</Button>,
        <Button key="2">Operation</Button>,
        <Button key="1" type="primary">
          Primary
        </Button>,
      ]}
    >
      <Descriptions size="small" column={3}>
        <Descriptions.Item label="Created">Lili Qu</Descriptions.Item>
        <Descriptions.Item label="Association">
          <a>421421</a>
        </Descriptions.Item>
        <Descriptions.Item label="Creation Time">2017-01-10</Descriptions.Item>
        <Descriptions.Item label="Effective Time">2017-10-10</Descriptions.Item>
        <Descriptions.Item label="Remarks">
          Gonghu Road, Xihu District, Hangzhou, Zhejiang, China
        </Descriptions.Item>
      </Descriptions>
    </PageHeader>
    <br />
    <PageHeader
      onBack={() => window.history.back()}
      title="Title"
      tags={<Tag color="blue">Running</Tag>}
      subTitle="This is a subtitle"
      extra={[
        <Button key="3">Operation</Button>,
        <Button key="2">Operation</Button>,
        <Button key="1" type="primary">
          Primary
        </Button>,
      ]}
```

```
    >
      <Row>
