Example app with [Flow](#)

This example shows how you can use Flow, with the transform-flow-strip-types babel plugin stripping flow type annotations from your output code.

Deploy your own

Deploy the example using [Vercel](#) or preview live with [StackBlitz](#)

▲ Deploy

How to use

Execute `create-next-app` with [npm](#) or [Yarn](#) to bootstrap the example:

```
npx create-next-app --example with-flow with-flow-app
# or
yarn create next-app --example with-flow with-flow-app
# or
pnpm create next-app -- --example with-flow with-flow-app
```

Deploy it to the cloud with [Vercel](#) ([Documentation](#)).
