Short URL API

Use this API to create shortened URLs. A short URL represents a longer URL containing complex query parameters in a smaller and simpler format.

Create short URL

```
POST /api/short-urls
```

Creates a short URL.

Example request:

```
POST /api/short-urls HTTP/1.1
Accept: application/json
Content-Type: application/json
Authorization: Bearer eyJrIjoiT0tTcG1pUlY2RnVKZTFVaDFsNFZXdE9ZWmNrMkZYbk

{
  "path": "d/TxKARsmGz/new-dashboard?orgId=1&from=1599389322894&to=1599410922894"
}
```

JSON body schema:

- **path** – The path to shorten, relative to the Grafana [root_url]({{< relref "../administration/configuration.md#root_url" >}}).

Example response:

```
HTTP/1.1 200
Content-Type: application/json

{
  "uid": AT76wBvGk,
  "url": http://localhost:3000/goto/AT76wBvGk?orgId=1
}
```

Status codes:

- **200** – Created
- **400** – Errors (invalid JSON, missing or invalid fields)
