Example app with cssed

This example shows how to use [cssed](#), a CSS-in-JS library, with Next.js.

We are creating `div` element with local scoped styles. The styles includes the use of pseudo-selector.

Deploy your own

Deploy the example using [Vercel](#) or preview live with [StackBlitz](#)

▲ Deploy

How to use

Execute [`create-next-app`](#) with [npm](#) or [Yarn](#) to bootstrap the example:

```
npx create-next-app --example with-cssed with-cssed-app
# or
yarn create next-app --example with-cssed with-cssed-app
# or
pnpm create next-app -- --example with-cssed with-cssed-app
```

Deploy it to the cloud with [Vercel](#) ([Documentation](#)).
