Contributing

If you would like to contribute code to go-jose you can do so through GitHub by forking the repository and sending a pull request.

When submitting code, please make every effort to follow existing conventions and style in order to keep the code as readable as possible. Please also make sure all tests pass by running `go test`, and format your code with `go fmt`. We also recommend using `golint` and `errcheck`.

Before your code can be accepted into the project you must also sign the Individual Contributor License Agreement.
