Guava Release 09: Release Notes

Release 09 was released on April 7, 2011. (See ReleaseHistory.)

Download it

Javadocs are included, but more complete javadocs (using the "-linksource" and "-use" javadoc options) are always available on-line:

Full API Documentation

Using Guava in your project

Here are some code/config snippets for how to UseGuavaInYourBuild.

This release will be identified in the Maven "central" repository used by maven, ivy, gradle, ant (with maven ant tasks) as com.google.guava:guava:r09.

API Changes

Full JDiff Report of changes since release 08

To build a combined report of the API changes between release 09 and any older release, check out our source tree and run `svn/tags/release09/javadoc/jdiff/jdiff.sh` with the previous release number as argument (example: `jdiff.sh 05`).
