N_TTY

The default (and fallback) :doc:`TTY line discipline <tty_ldisc>`. It tries to handle characters as per POSIX.

> **System Message: ERROR/3** (`D:\onboarding-resources\sample-onboarding-resources\linux-master\Documentation\tty\(linux-master)(Documentation)(tty)n_tty.rst`, **line 9**); *backlink*
>
> Unknown interpreted text role "doc".
