Description

How to reproduce

```
package main

import (
    "github.com/gin-gonic/gin"
)

func main() {
    g := gin.Default()
    g.GET("/hello/:name", func(c *gin.Context) {
        c.String(200, "Hello %s", c.Param("name"))
    })
    g.Run(":9000")
}
```

Expectations

```
$ curl http://localhost:8201/hello/world
Hello world
```

Actual result

```
$ curl -i http://localhost:8201/hello/world
<YOUR RESULT>
```

Environment

- go version:
- gin version (or commit ref):
- operating system:
