dnf plugin

This plugin makes `dnf` usage easier by adding aliases for the most common commands.

`dnf` is the new package manager for RPM-based distributions, which replaces `yum`.

To use it, add `dnf` to the plugins array in your zshrc file:

```
plugins=(... dnf)
```

Aliases

Alias	Command	Description
dnfl	`dnf list`	List packages
dnfli	`dnf list installed`	List installed packages
dnfgl	`dnf grouplist`	List package groups
dnfmc	`dnf makecache`	Generate metadata cache
dnfp	`dnf info`	Show package information
dnfs	`dnf search`	Search package
Use sudo		
dnfu	`sudo dnf upgrade`	Upgrade package
dnfi	`sudo dnf install`	Install package
dnfgi	`sudo dnf groupinstall`	Install package group
dnfr	`sudo dnf remove`	Remove package
dnfgr	`sudo dnf groupremove`	Remove package group
dnfc	`sudo dnf clean all`	Clean cache
