Allow files are lists of words to accept unconditionally

While check spelling will complain about an expected word which is no longer present, you can include things here even if they are not otherwise present in the repository.

E.g., you could include a list of system APIs here, or potential contributors (so that if a future commit includes their name, it'll be accepted).

Files

File	Description
Allow	Supplements to the dictionary
Chinese	Chinese words
Japanese	Japanese words
Microsoft	Microsoft brand items
Fonts	Font names
Names	Names of people
Colors	Names of color
