Dash plugin

This plugin adds command line functionality for Dash, an API Documentation Browser for macOS. This plugin requires Dash to be installed to work.

To use it, add `dash` to the plugins array in your zshrc file:

```
plugins=(... dash)
```

Usage

- Open and switch to the dash application.

```
dash
```

- Query for something in dash app: `dash query`

```
dash golang
```

- You can optionally provide a keyword: `dash [keyword:]query`

```
dash python:tuple
```
