strip-json-comments

> *Strip comments from JSON. Lets you use comments in your JSON files!*

This is now possible:

```
{
    // Rainbows
    "unicorn": /* 🖤 */ "cake"
}
```

It will replace single-line comments `//` and multi-line comments `/**/` with whitespace. This allows JSON error positions to remain as close as possible to the original source.

Also available as a [Gulp](#)/[Grunt](#)/[Broccoli](#) plugin.

Install

```
$ npm install strip-json-comments
```

Usage

```
const json = `{
    // Rainbows
    "unicorn": /* 🖤 */ "cake"
}`;

JSON.parse(stripJsonComments(json));
//=> {unicorn: 'cake'}
```

API

stripJsonComments(jsonString, options?)

jsonString

Type: `string`

Accepts a string with JSON and returns a string without comments.

options

Type: `object`

whitespace

Type: `boolean`
Default: `true`

Replace comments with whitespace instead of stripping them entirely.

Benchmark

```
$ npm run bench
```
