# ansible plugin

## Introduction

The `ansible plugin` adds several aliases for useful [ansible](#) commands and [aliases](#).

To use it, add `ansible` to the plugins array of your zshrc file:

```
plugins=(... ansible)
```

## Aliases

| Command | Description |
| --- | --- |
| `ansible-version` / `aver` | Show the version on ansible installed in this host |
| `ansible-role-init <role name>` / `arinit` | Creates the Ansible Role as per Ansible Galaxy standard |
| `a` | command `ansible` |
| `aconf` | command `ansible-config` |
| `acon` | command `ansible-console` |
| `ainv` | command `ansible-inventory` |
| `aplaybook` | command `ansible-playbook` |
| `ainv` | command `ansible-inventory` |
| `adoc` | command `ansible-doc` |
| `agal` | command `ansible-galaxy` |
| `apull` | command `ansible-pull` |
| `aval` | command `ansible-vault` |
