# Next.js example

How to use

Download the example [or clone the repo](#):

```
curl https://codeload.github.com/mui/material-ui/tar.gz/master | tar -xz --strip=2
material-ui-master/examples/nextjs
cd nextjs
```

Install it and run:

```
npm install
npm run dev
```

or:

⚡ Open in StackBlitz

◈ Edit on CodeSandbox

The idea behind the example

The project uses [Next.js](#), which is a framework for server-rendered React apps. It includes `@mui/material` and its peer dependencies, including `emotion`, the default style engine in MUI v5. If you prefer, you can [use styled-components instead](#).

The link component

Next.js has [a custom Link component](#). The example folder provides adapters for usage with MUI. More information [in the documentation](#).

What's next?

You now have a working example project. You can head back to the documentation, continuing browsing it from the [templates](#) section.
