ansible plugin

Introduction

The `ansible plugin` adds several aliases for useful ansible commands and aliases.

To use it, add `ansible` to the plugins array of your zshrc file:

```
plugins=(... ansible)
```

Aliases

Command	Description
`ansible-version` / `aver`	Show the version on ansible installed in this host
`ansible-role-init <role name>` / `arinit`	Creates the Ansible Role as per Ansible Galaxy standard
`a`	command `ansible`
`aconf`	command `ansible-config`
`acon`	command `ansible-console`
`ainv`	command `ansible-inventory`
`aplaybook`	command `ansible-playbook`
`ainv`	command `ansible-inventory`
`adoc`	command `ansible-doc`
`agal`	command `ansible-galaxy`
`apull`	command `ansible-pull`
`aval`	command `ansible-vault`
