Versions of `node-gyp` that are earlier than v8.x.x

Please look thru your error log for the string `gyp info using node-gyp@` and if that version number is less than the [current release of node-gyp](#) then **please upgrade** using [these instructions](#) and then try your command again.

`node-sass` is deprecated

Please be aware that the package [node-sass](#) [is deprecated](#) so you should actively seek alternatives. Please avoid opening new `node-sass` issues on this repo. You can try `npm install --global node-sass@latest` but we [cannot help much](#) here.

Issues finding the installed Visual Studio

In cmd, [`npm config set msvs_version 20xx`](#) with *xx* matching your locally installed version of Visual Studio.
