Please follow the guide below

- You will be asked some questions, please read them **carefully** and answer honestly
- Put an ` x ` into all the boxes [ ] relevant to your *pull request* (like that [x])
- Use *Preview* tab to see how your *pull request* will actually look like

---

Before submitting a *pull request* make sure you have:

- ☐ [Searched](#) the bugtracker for similar pull requests
- ☐ Read [adding new extractor tutorial](#)
- ☐ Read [youtube-dl coding conventions](#) and adjusted the code to meet them
- ☐ Covered the code with tests (note that PRs without tests will be REJECTED)
- ☐ Checked the code with [flake8](#)

In order to be accepted and merged into youtube-dl each piece of code must be in public domain or released under [Unlicense](#). Check one of the following options:

- ☐ I am the original author of this code and I am willing to release it under [Unlicense](#)
- ☐ I am not the original author of this code but it is in public domain or released under [Unlicense](#) (provide reliable evidence)

What is the purpose of your *pull request*?

- ☐ Bug fix
- ☐ Improvement
- ☐ New extractor
- ☐ New feature

Description of your *pull request* and other information

Explanation of your *pull request* in arbitrary form goes here. Please make sure the description explains the purpose and effect of your *pull request* and is worded well enough to be understood. Provide as much context and examples as possible.
