zh-CN

`@ant-design/icons@4.1.0` 以后，`scriptUrl` 可引用多个资源，用户可灵活的管理 [iconfont.cn](#) 图标。如果资源的图标出现重名，会按照数组顺序进行覆盖。

en-US

You can use `scriptUrl` as an array after `@ant-design/icons@4.1.0`, manage icons in one `<Icon />` from multiple [iconfont.cn](#) resources. If icon with a duplicate name in resources, it will overrided in array order.

```
import { Space } from 'antd';
import { createFromIconfontCN } from '@ant-design/icons';

const IconFont = createFromIconfontCN({
  scriptUrl: [
    '//at.alicdn.com/t/font_1788044_0dwu4guekcwr.js', // icon-javascript, icon-java,
icon-shoppingcart (overrided)
    '//at.alicdn.com/t/font_1788592_a5xf2bdic3u.js', // icon-shoppingcart, icon-
python
  ],
});

export default () => (
  <Space>
    <IconFont type="icon-javascript" />
    <IconFont type="icon-java" />
    <IconFont type="icon-shoppingcart" />
    <IconFont type="icon-python" />
  </Space>
);
```
