Redux

https://using-redux.gatsbyjs.org/

Gatsby example site that shows use of redux.

Overview

To use redux in a Gatsby site you'll need to hook in to two of Gatsby's extension points.

Once in `wrapRootElement` which runs during Gatsby's server rendering process, and once in `wrapRootElement` which is part of Gatsby's browser APIs.

Check out `./gatsby-ssr.js` and `./gatsby-browser.js` to see how this is implemented in this example.
