reveal js

tests passing | try the reveal.js editor | S

reveal.js is an open source HTML presentation framework. It enables anyone with a web browser to create beautiful presentations for free. Check out the live demo at revealjs.com.

The framework comes with a powerful feature set including nested slides, Markdown support, Auto-Animate, PDF export, speaker notes, LaTeX typesetting, syntax highlighted code and an extensive API.

Sponsors

Hakim's open source work is supported by GitHub sponsors. Special thanks to:

Getting started

- 🚀 Install reveal.js
- 👀 View the demo presentation
- 📖 Read the documentation
- 🖋 Try the visual editor for reveal.js at Slides.com
- 🎬 Watch the reveal.js video course (paid)

Online Editor

Want to create your presentation using a visual editor? Try the official reveal.js presentation platform for free at Slides.com. It's made by the same people behind reveal.js.
