zh-CN

通过设置 `itemLayout` 属性为 `vertical` 可实现竖排列表样式。

en-US

Set the `itemLayout` property to `vertical` to create a vertical list.

```jsx
import { List, Avatar, Space } from 'antd';
import { MessageOutlined, LikeOutlined, StarOutlined } from '@ant-design/icons';

const listData = [];
for (let i = 0; i < 23; i++) {
  listData.push({
    href: 'https://ant.design',
    title: `ant design part ${i}`,
    avatar: 'https://joeschmoe.io/api/v1/random',
    description:
      'Ant Design, a design language for background applications, is refined by Ant
UED Team.',
    content:
      'We supply a series of design principles, practical patterns and high quality
design resources (Sketch and Axure), to help people create their product prototypes
beautifully and efficiently.',
  });
}

const IconText = ({ icon, text }) => (
  <Space>
    {React.createElement(icon)}
    {text}
  </Space>
);

export default () => (
  <List
    itemLayout="vertical"
    size="large"
    pagination={{
      onChange: page => {
        console.log(page);
      },
      pageSize: 3,
    }}
    dataSource={listData}
    footer={
      <div>
        <b>ant design</b> footer part
      </div>
    }
    renderItem={item => (
```

```
    <List.Item
      key={item.title}
      actions={[
        <IconText icon={StarOutlined} text="156" key="list-vertical-star-o" />,
        <IconText icon={LikeOutlined} text="156" key="list-vertical-like-o" />,
        <IconText icon={MessageOutlined} text="2" key="list-vertical-message" />,
      ]}
      extra={
        <img
          width={272}
          alt="logo"

src="https://gw.alipayobjects.com/zos/rmsportal/mqaQswcyDLcXyDKnZfES.png"
        />
      }
    >
      <List.Item.Meta
        avatar={<Avatar src={item.avatar} />}
        title={<a href={item.href}>{item.title}</a>}
        description={item.description}
      />
      {item.content}
    </List.Item>
  )}
  />
);
```
