Generic Block Device Capability

This file documents the sysfs file `block/<disk>/capability`.

`capability` is a bitfield, printed in hexadecimal, indicating which capabilities a specific block device supports:

<div style="border:1px solid black">

System Message: ERROR/3 (`D:\onboarding-resources\sample-onboarding-resources\linux-master\Documentation\block\[linux-master][Documentation][block]capability.rst`, **line 10**)

Unknown directive type "kernel-doc".

```
.. kernel-doc:: include/linux/blkdev.h
```

</div>
