format-stale-output

Format the output of actions/stale into something you can pass to pullreminders/slack-action as blocks.

Inputs

`staled-issues-prs`

Comes from [actions/stale](#).

`closed-issues-prs`

Comes from [actions/stale](#).

Outputs

`blocks`

Something you can directly pass to [pullreminders/slackaction](#) like:

```
- name: Slack Report Closed Issues
  uses: pullreminders/slack-action@v1.0.7
  env:
    SLACK_BOT_TOKEN: ${{ secrets.SLACK_TOKEN }}
  with:
    args: '{\"channel\": \"${{ secrets.SLACK_STALE_CHANNEL_ID }}\", \"text\": \"\",
\"blocks\": ${{ steps.format-stale-output.outputs.blocks }} }'
```

Example Usage

```
name: Stale Bot
on:
  schedule:
    - cron: "0 */12 * * *"
jobs:
  stale:
    runs-on: ubuntu-latest
    steps:
      - uses: actions/stale@v4
        name: stale
        id: stale
        with:
          days-before-stale: 20
          days-before-close: 40
      - name: Format Stale Output
        id: format-stale-output
        uses: ./.github/actions/format-stale-output
        with:
          staled-issues-prs: ${{ steps.stale.outputs.staled-issues-prs }}
          closed-issues-prs: ${{ steps.stale.outputs.closed-issues-prs }}
```

```
    - name: Slack Report Closed Issues
      uses: pullreminders/slack-action@v1.0.7
      env:
        SLACK_BOT_TOKEN: ${{ secrets.SLACK_TOKEN }}
      with:
        args: '{\"channel\": \"${{ secrets.SLACK_STALE_CHANNEL_ID }}\", \"text\":
 \"\", \"blocks\": ${{ steps.format-stale-output.outputs.blocks }} }'
```

Building this Action

Use [@vercel/ncc](#) to compile this action. You can run `npm run build` in this directory to run the command.
