+++ title = "Change UI theme" description = "How to set the Grafana UI theme" keywords = ["grafana", "configuration", "documentation", "home"] weight = 200 +++

Change Grafana UI theme

In Grafana, you can modify the UI theme configured in the Settings or Preferences. Set the UI theme for the server, an organization, a team, or your personal user account using the instructions in this topic.

{{< docs/shared "preferences/some-tasks-require-permissions.md" >}}

Theme options

The theme affects how Grafana displays graphs, menus, other UI elements.

Default

Default is either the dark theme or the theme selected in a higher level. For example, if an Organization administrator set the **Light** theme, then that is the default for all the teams in that organization.

Dark

Here is an example of the dark theme.

![Dark theme example]Dark theme example

Light

Here is an example of the light theme.

Change server UI theme

Grafana server administrators can change the Grafana UI theme for all users on the server by setting the [default_theme]({{< relref "../configuration.md#default-theme" >}}) option in the Grafana configuration file.

To see what the current settings are, refer to [View server settings]({{< relref "../view-server/view-server-settings.md" >}}).

Change organization UI theme

Organization administrators can change the UI theme for all users in an organization.

{{< docs/list >}} {{< docs/shared "preferences/org-preferences-list.md" >}} {{< docs/shared "preferences/select-ui-theme-list.md" >}} {{< /docs/list >}}

Change team UI theme

Organization and team administrators can change the UI theme for all users in a team.

{{< docs/list >}} {{< docs/shared "manage-users/view-team-list.md" >}}

1. Click on the team that you want to change the UI theme for and then navigate to the **Settings** tab. {{< docs/shared "preferences/select-ui-theme-list.md" >}} {{< /docs/list >}}

Change your personal UI theme

You can change the UI theme for your user account. This setting overrides UI theme settings at higher levels.

{{< docs/list >}} {{< docs/shared "preferences/navigate-user-preferences-list.md" >}} {{< docs/shared "preferences/select-ui-theme-list.md" >}} {{< /docs/list >}}
