Example app with google analytics & amp

This example shows how to use [Next.js](#) along with [Google Analytics](#) in conjunction with [AMP](#). A custom [_document](#) is used to inject [tracking snippet](#) and track [pageviews](#) and [event](#). There are two separate initializations of the Google Analytics tracking code; one for AMP and one for non-AMP pages.

Deploy your own

Deploy the example using [Vercel](#):

[▲ Deploy]

How to use

Execute `create-next-app` with [npm](#) or [Yarn](#) to bootstrap the example::

```
npx create-next-app --example with-google-analytics-amp with-google-analytics-amp-
app
# or
yarn create next-app --example with-google-analytics-amp with-google-analytics-amp-
app
# or
pnpm create next-app -- --example with-google-analytics-amp with-google-analytics-
amp-app
```

Deploy it to the cloud with [Vercel](#) ([Documentation](#)).
