1. Download the `Terminal.wprp` [file from this repository](#) somewhere on your PC. For example, let's put the file at `C:\path\to\Terminal.wprp`
2. From an elevated commandline, run:

```
wpr -start C:\path\to\Terminal.wprp!Terminal.Verbose
```

3. Reproduce the error.
4. Go back to the elevated commandline window and run:

```
wpr -stop terminal-trace.etl
```

5. Take the `terminal-trace.etl` file and send it to the person who requested that you follow this guide.
