## Page.$() method

Runs `document.querySelector` within the page. If no element matches the selector, the return value resolves to `null`.

Signature:

```
$<T extends Element = Element>(selector: string): Promise<ElementHandle<T> | null>;
```

## Parameters

| Parameter | Type | Description |
| --- | --- | --- |
| selector | string | A selector to query page for selector to query page for. |

Returns:

Promise<ElementHandle<T> | null>

## Remarks

Shortcut for Page.mainFrame().$(selector).
