Azure Storage SDK for Go (Preview)

:exclamation: IMPORTANT: This package is in maintenance only and will be deprecated in the future. Please use one of the following packages instead.

Service	Import Path/Repo
Storage - Blobs	github.com/Azure/azure-storage-blob-go
Storage - Files	github.com/Azure/azure-storage-file-go
Storage - Queues	github.com/Azure/azure-storage-queue-go

The `github.com/Azure/azure-sdk-for-go/storage` package is used to manage Azure Storage data plane resources: containers, blobs, tables, and queues.

To manage storage *accounts* use Azure Resource Manager (ARM) via the packages at github.com/Azure/azure-sdk-for-go/services/storage.

This package also supports the Azure Storage Emulator (Windows only).
