PaymentDiscount Object

- **identifier** string - A string used to uniquely identify a discount offer for a product.
- **keyIdentifier** string - A string that identifies the key used to generate the signature.
- **nonce** string - A universally unique ID (UUID) value that you define.
- **signature** string - A UTF-8 string representing the properties of a specific discount offer, cryptographically signed.
- **timestamp** number - The date and time of the signature's creation in milliseconds, formatted in Unix epoch time.
